Profile

MSc Information Systems and Operations Management student with 2 years of commercial software engineering experience, specializing in modern Frontend Development. Highly proficient in building clean, efficient, and well-tested digital solutions in Agile environments using JavaScript, TypeScript, and modern frameworks. A proactive problem-solver and collaborative communicator, I am driven by the challenge of mastering new technologies and bridging the gap between complex data systems and intuitive user experiences.

Education

MSc Information Systems and Operations Management, University of Nottingham, UK

Sep 2025 – Sep 2026

Modules: Data Management and Manipulation, Project Management, Business Intelligence and Analytics, E-Business, Information System Design and Development.

Research Consultant, Enterprise Mobility, Nottingham, UK

Nov 2025 – Mar 2026

- Collaborated in a team of five to develop a comprehensive city launch and marketing strategy for Enterprise Mobility's expansion into a new market.
- Led budget planning and allocation, managing a total budget of £100,000 split equally across the launch event and marketing strategy.
- Conducted in-depth research and analysis to provide actionable insights and recommendations for the launch campaign.
- Engaged in strategic discussions to align the team's creative vision with client expectations and project objectives.

Bachelor of Technology in Chemical Engineering, National Institute of Technology, India

Grade: 2:1

Jul 2019 – May 2023

Technical Skill

- Programming & Data: JavaScript (ES6+), TypeScript, Python (Pandas, NumPy), SQL, MongoDB.
- Frontend & UI: React.js, Angular, HTML5, CSS3/SCSS, Material UI, Tailwind CSS, LWC, Node.js, Express.
- Analysis & Visualization: Data Visualisation (Power BI), Apex-charts.
- Practices & Tools: Agile Methodology, CI/CD, Unit Testing (Git/JIRA), ADA/WCAG Compliance.
- Professional & Soft Skills: Strategic Problem Solving, Stakeholder Management, Cross-functional Collaboration, Time Estimation, Root Cause Analysis, PoC Development, Client Demos, and Technical & RFP Documentation.

Work Experience

Front-End Developer, Deloitte US offices of India Pvt. Ltd., Bangalore, India

Jul 2023 – Jul 2025

- Worked on the migration of complex enterprise applications from legacy Angular to a modern React ecosystem to resolve performance bottlenecks, optimizing code structures with TypeScript and Material UI, and shared component library to accelerate feature delivery speed by 20%.
- Spearheaded the development of a customized AI chatbot analytics dashboard for a Government Healthcare Department using Apex-charts, coordinating cloud-based releases and feedback cycles that improved client decision-making efficiency by 25%.
- Integrated multi-participant video calling and barcode scanning features for a high-stakes government client pitch using the Amazon Chime SDK, utilizing mobile-first development to ensure platform compatibility and a 15% improvement in performance analysis scores.
- Developed highly accessible government portals utilizing Lightning Web Components (LWC), ensuring 100% compliance with ADA and WCAG standards while driving a 10% increase in

operational efficiency through cross-team knowledge transfer.

- Automated development workflows across four enterprise applications by implementing Husky pre-commit hooks and updating project dependencies, successfully reducing Continuous Integration (CI) build failures by 20%.
- Recognized with 3 awards at Deloitte for consistent contributions and dedication.

Professional Projects at Deloitte

Front-End Developer for a Customized AI Chatbot Application, Policy Engine Nov 2023 – Oct 2024

- Built and delivered analytics dashboards aligned to client requirements, boosting client insight and decision making by 25%.
- Coordinated cloud-based feature releases with comprehensive project documentation, user feedback cycles, and client demos, supporting releases moving through environments to production.

Front-End Developer for Firm Initiative Client Pitch, Professionals Healthcare App

Nov 2024 – Dec 2024

- Delivered barcode scanning and multi-party video calling features, collaborating in cross-functional teams to ensure platform compatibility and robust testing.
- Enhanced project documentation and user acceptance through iterative mobile-first development and performance analysis.

UI Developer for Government Client, Foster Care & Child Welfare Portal

Nov 2024 – Jul 2025

- Delivered accessible and responsive portals with robust Lightning Web Components, aligning to compliance standards.
- Tracked project milestones, led onboarding, knowledge transfer, and ownership for new team members.

Personal Project

Portfolio Website | React, Framer Motion, Tailwind CSS, Formik, Yup

Nov 2025

- Built a personal portfolio SPA with React, Framer Motion, and Tailwind CSS featuring smooth animations, responsive design, and Formik/Yup form validation.

Swiggy Clone | React, Redux Toolkit, Webpack, Jest

Oct 2024

- Developed a full-featured food delivery app clone using React, Redux Toolkit, and Webpack; implemented RESTful API integration, custom hooks, Context API for state management, and automated testing with React Testing Library and Jest.

HR Leave Tracking System | React, Node.js, Express, MongoDB, JWT

Jan 2026

- Built a full-stack MERN Leave Management System with Role-Based Access Control and production-ready JWT authentication, delivered as part of the Information System Design and Development module.
