Profile

I am a frontend engineer with 2 years of commercial experience building React and TypeScript products for enterprise clients at Deloitte, and I am completing an MSc in Information Systems and Operations Management. I build reusable, component-based UIs from design through to production — Angular-to-React migration, responsive and accessible interfaces, REST API integration, Jest and React Testing Library coverage and Cypress end-to-end suites — and I have shipped my own products end to end, from a portfolio SPA to a full-stack MERN application. I enjoy solving complex technical problems and building scalable, resilient solutions that teams can build on.

Technical Skills

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Python, SQL.
- Frameworks & Libraries: React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, Framer Motion, Angular, Node.js, Express, ApexCharts, Lightning Web Components.
- Testing & Build: Jest, React Testing Library, Cypress, Webpack, Husky.
- Cloud & Data: Vercel, AWS (Amazon Chime SDK), MongoDB, SQLite, Microsoft Power Platform, Power BI.
- Developer Tools: Git, JIRA, CI/CD pipelines, REST APIs, JWT, Figma, Locofy, Claude.

Work Experience

Digital Strategy Lead, Nova Interiors, Chesterfield, UK (Remote, Part-time)

Jun 2026 – Present

- Own end-to-end delivery of Nova Interiors' procurement-to-goods-received digitisation, from discovery and process mapping through build to production rollout.
- Build Power Apps and Power Automate solutions replacing a manual workflow, integrated with Sage Business Cloud Accounting for end-to-end spend visibility.
- Work directly with purchasing and warehouse users to turn requirements into a documented future-state design, then ship against it.

Front-End Developer, Deloitte US offices of India Pvt. Ltd., Bangalore, India

Jul 2023 – Jul 2025

- Migrated enterprise applications from Angular to a reusable, component-based React and TypeScript architecture, cutting team feature-delivery time by 20%.
- Built an AI policy engine chatbot and owned its analytics dashboard for a government client, improving client operational efficiency by 25%.
- Integrated real-time video calling and barcode scanning into a healthcare client application, working with backend engineers on the supporting REST APIs.
- Developed responsive, accessible government portals meeting ADA/WCAG 2.1 standards, working from designer-supplied style guides.
- Tested production UIs with Jest and React Testing Library unit coverage and Cypress end-to-end suites, catching regressions before release.
- Reviewed and debugged code written by other engineers, and implemented Husky pre-commit hooks across four applications, cutting CI build failures by 20%.
- Ran a proof of concept with a colleague evaluating Locofy for Figma design-to-code conversion, assessing how the generated React components fitted the existing codebase.
- Recognised with 3 Deloitte awards for sustained delivery across client engagements.

Professional Projects at Deloitte

Front-End Developer for a Customized AI Chatbot Application, Policy Engine Nov 2023 – Oct 2024

- Delivered React analytics dashboards against product requirements, shortening reporting and decision cycles.
- Coordinated cloud-based releases end to end, covering documentation, feedback cycles and client demos.

Front-End Developer for Firm Initiative Client Pitch, Professionals Healthcare App

Nov 2024 – Dec 2024

- Delivered barcode scanning and video calling features working directly with product, design and backend engineers.
- Improved usability and user acceptance through iterative, mobile-first development.

UI Developer for Government Client, Foster Care & Child Welfare Portal Nov 2024 – Jul 2025

- Delivered accessible, responsive portals for a government client from design handoff to production.
- Mentored and onboarded new team members, running knowledge-transfer sessions across the codebase.

Projects

Portfolio Website | React, Tailwind CSS, Framer Motion, Formik, Yup

Nov 2025

- Designed, built and deployed a personal portfolio SPA on Vercel with Framer Motion animations, Tailwind styling and validated contact forms - portfolio-project-1dpy.vercel.app.

HR Leave Tracking System | React, Node.js, Express, MongoDB, JWT

Jan 2026

- Built a full-stack MERN leave management system with role-based access control and a REST API designed alongside the React client.

Swiggy Clone | React, Redux Toolkit, Webpack, Jest

Oct 2024

- Built a food delivery application clone in React with Redux Toolkit state management, live REST API integration and Jest unit tests.

Education

MSc Information Systems and Operations Management, University of Nottingham, UK

Sep 2025 – Sep 2026

Modules: Data Management and Manipulation, Project Management, Business Intelligence and Analytics, E-Business, Information System Design and Development.

Benefit Navigator - MSc Dissertation Prototype, University of Nottingham

Aug 2026

- Designed and shipped a citizen-facing web application solo in Python and Flask, covering the full stack from data model to responsive, mobile-first UI.
- Wrote 126 automated tests covering access control, input handling and data completeness; published at github.com/Yash-Thakkar14/benefit-navigator.

Technical Lead, Augimono, Nottingham, UK (Remote)

Jul 2026

- Led technical direction on a one-month Practera micro-placement with Augimono, translating early-stage product concepts into build-ready specifications the development team implemented directly.

Bachelor of Technology in Chemical Engineering, National Institute of Technology, India

Grade: 2:1

Jul 2019 – May 2023
